

Smoke Alarms at Home

Smoke alarms are a key part of a home fire escape plan. When there is a fire, smoke spreads fast. Working smoke alarms give you early warning so you can get outside quickly.

SAFETY TIPS

- KKK Install smoke alarms outside each bedroom and sleeping area. Install alarms on every level of the home. Install alarms in the basement.
- KKK Large homes may need extra smoke alarms.
- KKK It is best to use interconnected smoke alarms. When one smoke alarm sounds they all sound.
- KKK Test all smoke alarms at least once a month. Press the test button to be sure the alarm is working.
- KKK There are two kinds of alarms. Ionization smoke alarms are quicker to warn about flaming fires. Photoelectric alarms are quicker to warn about smoldering fires. It is best to use both types of alarms in the home.
- KKK A smoke alarm should be on the ceiling or high on a wall. Keep smoke alarms away from the kitchen to reduce false alarms. They should be at least 10 feet (3 meters) from the stove.
- KKK People who are hard-of-hearing or deaf can use special alarms. These alarms have strobe lights and bed shakers.
- KKK Replace all smoke alarms when they are 10 years old.

FACTS

- State law requires that all new battery-operated smoke alarms have a sealed ten-year battery.

Smoke alarms have a lifespan of ten years and then should be replaced.

- Roughly 2 out of 3 fire deaths happen in homes with no smoke alarms or alarms that are not working.
